

The Acca Killer Checklist

7 filters we run before any pick hits GoalScope - kill 80% of bad accas before kick-off.

1 PAGE | 30-SECOND SCAN | FOR WAT ACCUMULATOR BETTORS

Who this is for: You bet accumulators on SportyBet / Bet9ja, love 50-300 odds, but 1 leg kills your slip. | **Not for:** "fixed matches" seekers.

- 1

The WAT Kick-Off Trap
Is kick-off verified in WAT - not a rotated cup XI? Check BBC / liverscores. If unverified, mark TBC and skip. Time kills more accas than form.
- 2

The Duplicate Killer
Is this match+market already on another slip? If yes - cut it. Never double-exposure across your accas in one day.
- 3

The Over 1.85 Rule
Is the price under 1.85 with no edge? If it needs a miracle to pay, it's not value. Leave slot empty rather than force it.
- 4

The Home/Away Split
Does the team actually score AWAY? Check last 5 away - not season average. Home giants often blank on the road.
- 5

The H2H Lie Detector
Last 5 meetings: was it BTTS/Over or 1-0 grind? Names lie, head-to-head tells the truth. 4/5 = pattern.
- 6

The Odds Movement Check
Has price dropped 0.15+ since morning? Bookies saw what you didn't. Re-verify live on sportybet.com before you bet.
- 7

The 1-Leg Cut Test
If you had to remove 1 leg to save the acca - which is it? That's the leg to cut BEFORE you stake. Your gut knows.

How to use tonight (30 seconds): Run each leg through 1-7. Any leg failing 2 checks = cut it. Failing 1 = halve stake or cut. An empty slot beats a losing leg every time.

Tonight Applied - 3 Real Filters (15 Sept)

Game	Pick	Filter	Verdict
Elche vs Real Madrid 20:30	Madrid W & O2.5 @2.00	Passed 7/7 - H2H 5/5 O2.5	KEEP 2-3 FT HIT
Genoa vs Sudtirol 17:00	Genoa W & O1.5 @1.75	Failed #5 - 1-0 FT, O1.5 missed	CUT 1-0 FT LOST
Padres @ Rockies 01:40	Over 10.5 @1.85	Coors 11.8 avg - pending at check	PENDING Pre-Game

Proof, not promises. Settled legs show score as status - green HIT / red LOST / amber PENDING on goalscope.github.io/predictions.html
